

Committed to Building Winning Partnerships with Co-Counsel

Simmons Hanly Conroy is dedicated to giving others a voice in the legal system and have received justice for thousands of clients nationwide. Our team works hard to ensure your referral fee is secured and that your client receives the personalized representation they deserve.

Partner with an experienced legal team backed by a proven and continuing track record of results. We have secured over \$11.7 billion in settlements and shared more than \$1.25 billion in referral fees.

We welcome the opportunity to collaborate with other lawyers and firms on the following cases.

Mesothelioma

For decades, asbestos manufacturers ignored the known dangers of exposure, placing profits above the safety of workers. Although many of those companies are now bankrupt, more than \$30 billion in court-ordered trusts has been established to compensate mesothelioma victims and their families.

Mesothelioma, a rare and devastating cancer, is directly linked to asbestos exposure in shipyards, mills, construction, automotive, and other industries, as well as through military service.

We pursue claims solely against asbestos product manufacturers—not the U.S. government or the military. Even if your client is deceased, surviving family members may still have viable claims.

Simmons Hanly Conroy represents more mesothelioma victims than any other firm in the country.

Our team has the experience, resources, and proven results to maximize recoveries for referred clients.

With decades of leadership in asbestos litigation, we are the trusted referral partner for firms whose clients face this diagnosis.

Talcum Powder

Johnson & Johnson Baby Powder, Shower-to-Shower, and other talc-based powder brands failed to include warnings on their products regarding the link between talcum powder and ovarian cancer.

NEC Baby Formula

Cow's milk-based baby formula and milk fortifier products (like Enfamil™ and Similac®) can greatly increase the risk of premature and low-birth-weight babies developing a potentially fatal intestinal disease called necrotizing enterocolitis (NEC).

Chemical Hair Straighteners/Relaxers

Women who used chemical hair straightening or relaxer products frequently (more than four times in a year) may have twice the risk of developing uterine cancer compared to those who didn't use the products, according to a study by the National Institutes of Health (NIH). Partner Jayne Conroy has been appointed to the Plaintiffs' Executive Committee for the hair relaxer products injury MDL in the U.S. District Court for the Northern District of Illinois.

Allergan Breast Implants

Allergan breast implants and tissue expanders have been linked to breast implant-associated anaplastic large-cell lymphoma (BIA-ALCL), a rare type of non-Hodgkin's lymphoma. Many women have experienced significant side effects associated with these recalled implants, undergoing invasive surgery, painful treatments, and the uncertainty of a cancer diagnosis.

Our dedication to client service, our national resources and our centuries of legal experience are what drive our results.

Call Simmons Hanly Conroy today at **800-572-8065** to learn more about our co-counsel partnerships.

Social Media Addiction

Meta's Facebook and Instagram, Snapchat, YouTube, and TikTok face an onslaught of social media addiction lawsuits nationwide. Partner Ellyn Hurd has been appointed to the Plaintiffs' Steering Committee in the MDL against Meta Platforms, Inc. and other defendants, which alleges social media platforms encourage addictive behavior in adolescents. Thousands of pages of internal documents were leaked that show Facebook knew the harm it was causing — especially to its youngest users.

Simmons Hanly Conroy uses decades of expertise and resources to level the playing field for clients against larger opponents.

Rideshare Assault

Across the country, brave individuals have filed lawsuits against Uber and other rideshare companies after being sexually assaulted or attacked by their drivers. We are committed to holding rideshare companies accountable for their negligence and fighting for justice on behalf of assault victims. Partner Ellyn Hurd has been named to the Plaintiffs' Steering Committee in the MDL consolidating rideshare sexual assault lawsuits against Uber.

Endoscopy Infection

Reusable endoscopes used in procedures like colonoscopies can be extremely difficult to fully clean between patients, allowing bacteria to become trapped and deadly antibiotic-resistant infections to spread.

The FDA has reported that at least 1 in 20 duodenoscopes remain contaminated even after cleaning. Manufacturers including Olympus, Fujifilm, and Pentax Medical have faced lawsuits for failing to warn hospitals and patients about these risks.

Bard® PowerPort™

Bard PowerPort — an implantable port that carries medicine into the bloodstream — can break apart within the body and cause serious harm to patients. Lawsuits against the manufacturer of these devices claim the company received multiple adverse event reports (AERs) that highlighted the dangers of its implantable ports, but failed to recall these devices or inform users of the risks.

Depo-Provera®

An injectable birth control method, Depo-Provera may increase the risk of brain tumors known as meningiomas in users. Patients may be able to file a lawsuit against Pfizer for failing to warn them about the potential dangers associated with this medication.

Roblox®

Every day, millions of children use the gaming platform Roblox®. Unfortunately, predators may also use the platform to groom children, manipulate them into sending inappropriate images, and meet them in person to cause further harm in some cases. Roblox lawsuits aim to hold the company accountable for failing to implement safeguards to protect young users.

Class Actions

Our attorneys have spent decades winning class action lawsuits. We have worked at the forefront of national cases, such as the Norfolk Southern train derailment lawsuit, Deepwater Horizon litigation, the Toyota unintended acceleration lawsuit, the GMO corn litigation against Swiss biotechnology company Syngenta, and more. If you have a potential class action claim, **contact our team today at 800-572-8065** to discuss how to get started.
